Ecovital - Preparations naturelles

Ecovital - Preparations naturelles

Complete line of professional cosmetic treatment, the **ECOVITAL**

- Preparations naturelles products with "ECO" formulation, have genuine effects to prevent aging phenomena, to protect the skin, ensuring its suppleness, firmness, young-look and healthy shine.

The products under the **ECOVITAL** trademark, using hydrolysis derivatives of *Novocain*, especially diethyl amino ethanol, combined in a natural complex of active principles, based on the biological demands of premature skin aging prophylaxis, have expelled the eventual allergic reactions induced by *Novocain* by:

- Moisturizing the skin and normalizing the water contents both in the external and internal layer of epidermis;
- Diminishing the damaging effects of free radicals, by impeding their formation and by stopping the per-oxidation of the membrane's lipids;
- Stimulation of the toxins-elimination process (the free radicals are removed by chemical reactions anti-oxidant vitamins and controlled enzymatic reactions);
- Reducing the local inflammatory and edematous phenomena;
- Stimulation of the fibro-blasts activity elastin and collagen generators;
- Stimulation of the lipolytic action leading to localized fats hydrolysis without blocking the cellular metabolism.

With its formula, rich in collagen and natural active principles (Avocado, Jojoba, Calendula, Wheat Germs, Primrose, Underbrush Oil), elastin and silanolic complex "anti-age", with natural UV protection agents, without synthetic colorants and alcohol, **ECOVITAL**

- Preparations naturelles ensure a complex anti-aging treatment.
